

JINGYUN HE

Senior Product Manager · FinTech · Payments · Embedded Finance

London, UK · No visa sponsorship required · [LinkedIn](#) · [Portfolio](#)

PROFILE

Product manager with 10+ years building regulated payments, merchant-lending and B2B SaaS products end to end — from discovery and roadmap through delivery and optimisation. Most of that work sat on a nationwide licensed acquiring platform, where I owned payment infrastructure, POS-based lending and embedded-finance products across engineering, risk, compliance and commercial teams — scaling to 1,000+ merchants, 500K+ annual transactions and £1.4M+ in annual revenue.

Came into fintech from six years of enterprise systems delivery for government and state-owned clients, and moved into payments in 2014 to build acquiring, lending and SaaS products from zero.

Now based in London and focused on UK fintech, with self-directed project work on FCA Consumer Duty and Open Banking.

CORE SKILLS

Product — Product strategy, discovery, requirements analysis, PRDs, user stories, acceptance criteria, backlog prioritisation, roadmapping, Scrum/Kanban, system integrations, stakeholder management, compliance collaboration

FinTech & Payments — Payments infrastructure, cross-border payments, transaction flows, payment orchestration, merchant lending, embedded finance, B2B SaaS, KYC/AML, ERP, GIS, operational workflow systems

Data & Analytics — SQL, data validation, product metrics, funnel analysis, UAT, A/B testing, defect triage, reporting logic

SELECTED UK MARKET WORK

Independent projects undertaken to build UK market fluency. Full write-ups in portfolio.

2024 – Present

UK Cross-Border Payment — Checkout Optimisation

Analysed remittance checkout journeys across UK fintech apps against FCA Consumer Duty findings. Produced a full product proposal covering journey mapping, RICE prioritisation, cross-team dependency analysis (Treasury, Compliance, Engineering) and success metrics.

SME Open Banking — Affordability Assessment

Designed an Open Banking-enabled SME lending journey benchmarked against leading UK SME lenders and data providers, identifying that Consumer Duty applicability turns on borrower legal structure. Produced an MVP journey, RICE priorities, user stories with acceptance criteria, and Risk/Engineering/Compliance dependencies.

EXPERIENCE

Product Manager — Enterprise Solutions & Product Delivery

2024 – Present

Enterprise ICT, IoT & healthcare informatics

Remote, UK-based

B2B product and requirements consulting across enterprise ICT, IoT and healthcare-informatics projects — translating complex enterprise workflows into product specifications, solution documents and bid materials.

- Own requirements discovery and specification for multi-stakeholder engagements across client business, engineering and bid teams.
- Relocated to the UK in 2024 and realigned 10 years of fintech product expertise to the UK market.

Senior Product Manager / Product Owner — B2B SaaS & Embedded Finance

2018 – 2024

Restaurant SaaS platform (~100 staff)

Beijing, China

Built a restaurant SaaS and embedded-finance platform on top of the payment rails I had productised in earlier roles, extending acquiring-and-lending capability into a new vertical across POS operations, payments, membership and transaction-driven financing. Led cross-functional product delivery across engineering, design and operations.

- Owned end-to-end development of merchant-facing financial products — POS-based lending, payment workflows, credit decisioning and transaction-driven analytics.
- Built integrated SaaS modules combining payments, CRM and operational tools, embedding financial services into merchant workflows.
- Scaled platform adoption to over 1,000 merchants generating £1.4M+ annual revenue, on a facilitated lending portfolio serving previously data-invisible restaurant merchants.
- Defined and tracked product metrics across payment performance, lending adoption, repayment behaviour, SaaS engagement and merchant retention.
- Partnered with Engineering, Risk and Compliance to deliver compliant financial products across discovery, roadmap prioritisation and Agile delivery.

Embedded Finance · Restaurant SaaS · POS Lending · Payment Integration

Senior Financial Product Manager — MCA & Investment Platform

2015 – 2018

Owned product strategy and delivery of a digital lending and investment platform built on the group's aggregated payment and acquiring flow — originating SME credit from merchant transaction data and matching it with funding on the platform.

- Launched bank-funded SME working-capital lending products underwritten on POS transaction flows and behavioural risk models.
- Built scalable origination workflows across onboarding, credit assessment, repayment and risk monitoring, underwritten on real-time POS transaction data rather than filed accounts.
- Improved credit approval efficiency through automation of decisioning, and grew merchant adoption across the acquiring network, supporting 500K+ annual transactions.
- Delivered the investment marketplace connecting funding sources with qualified borrowers — onboarding, allocation, disclosure and repayment.
- Structured asset-backed lending for industrial decarbonisation with a listed environmental-technology partner, funding emissions-conversion upgrades for plants outside bank credit criteria.

Senior Financial Product Manager — Payment Aggregation

2014 – 2015

Nationwide licensed acquirer (PBOC-licensed, equivalent to an FCA-authorised PI)

Beijing, China

Owned an aggregated payment platform built around proprietary POS terminals, integrating banks and digital wallets into a unified in-store ecosystem supporting QR-code and card-present transactions. Led product definition and delivery across engineering, operations, risk and compliance.

- Designed and optimised scalable payment flows across multiple channels, improving transaction completion rates by 15% and reducing checkout drop-offs by 20%.
- Worked with Engineering, Operations, Risk and Compliance on transaction reliability, timeout handling and retry mechanisms.
- Developed payment APIs and transaction processing workflows to improve checkout speed and stability; used analytics and A/B testing to reduce failed transactions.

Payment Infrastructure · In-Store Payments · POS Ecosystem · Transaction Flow Optimisation

PMO Senior Project Manager / Enterprise Systems Delivery Consultant

2010 – 2014

Large-scale IT services group

Beijing, China

- Recruited as a CMMI specialist and led the group through CMMI Level 3, qualifying it for larger government tenders.
- Governed delivery standards, performance management and daily operations for a group PMO of 100+ project managers.
- Built the group ERP from the ground up for a 10,000+ person organisation, re-engineering delivery, resourcing and reporting.
- Delivered systems transformation programmes for government and state-owned clients across banking, audit and environmental agencies, from bid through implementation.

Early Career — Pre-sales Consulting Engineer / B2B Product Manager

2008 – 2010

Enterprise GIS software provider

Beijing, China

- Led the company through CMMI Level 3 certification within two years, qualifying it to compete for national environmental-agency contracts.
- Produced technical proposals and bid materials behind 15 winning bids, worth an aggregate £15M+ in contract value across government and enterprise customers.
- Wrote detailed solution and system design specifications for government GIS projects and owned delivery through implementation, keeping budget overruns within 5%.
- Progressed from pre-sales consulting engineer to senior project manager and B2B product manager within two years, holding pre-sales and delivery roles concurrently.
